### Technical Skills

JavaScript	React
Ruby	jQuery
SQL	Node.js
HTML/CSS	Ruby on Rails
PL/SQL	Git
Python	Firebase
	API Design
	Oracle APEX

### Education

**Bloc**  
2017 - 2018  
Apprenticeship  
Full-Stack Web Development

**Riverside Community College**  
2014 - 2016  
CIS/CSC Courses  
Software Engineering with C++

### Volunteering

**Computer Science Tutor**  
Helped professors with tutoring their students on computer science topics during and after class time.

- Computer Information
- C++
- SQL
- Microsoft Office

### Experience

#### C3 Buisness Solutions

Santa Ana, CA

##### Software Developer

Dec. 2018 to Current

- Oracle Consultant for many different clients on a variety of projects using SQL, JavaScript, Python, and Oracle's APEX.
- Developed a client facing Cloud Data-Loader designed to parse and upload high-volume data into a variety of Oracle cloud databases with a 600% performance increase over the previous methods.
- Engineered C3's personalized Applicant Tracking System with JavaScript, Oracle SQL, and Oracle's APEX.

#### PeerRate

Riverside, CA

##### Front End Developer

Oct. 2017 to Dec. 2018

- Designed and Developed the web-foundations by applying AngularJS and Firebase to provide a responsive single page application.
- Contributed to the engineering of the Android application by utilizing Java with Android Studio.
- Implemented JavaScript, HTML5, and CSS3 to architect a modern UI/UX.

#### Exercism.io

##### JavaScript & Ruby Mentor

June 2018 to Dec. 2018

- Mentor aspiring software engineers through algorithmic coding challenges to introduce new ideas and techniques for providing stronger programming practices with cleaner and optimized code.
- Helped over 35 students with over 46 solutions in both JavaScript and Ruby.

### Projects

#### Mark it Off

Nov. 2017 to Dec. 2017

##### Ruby on Rails

Mark it Off is a platform to organize your to-do lists by forcing you to complete each task within seven days of creation.

#### Steam RPG Bot

Oct. 2017 to Current

##### Node.js

A Steam Ai for moderating community group chat rooms that allows for more than just moderation, such as an MMO Text adventure experience.
